What is a solar inverter?

As you've learned more about solar, you've likely discovered that while solar panels get all the glory, one of the most important components of your system is the solar inverter. Responsible for making the sun's energy usable in your home as well as the performance and safety of your system, it's a piece of kit worth getting right.

Who should install a solar inverter?

Solar inverters should always be installed by a professional installer,like ZEN Energy,with experience in solar energy systems. Attempting to install a solar inverter yourself could be dangerous and may also result in damage to the inverter,the solar panels,or other components of your solar energy system.

Which solar inverter is best?

In our opinion,Austrian-based company Fronius,offers the best solar inverters on the market right now,hands down. While they aren't the cheapest option,they do offer the best value. Here's why. The longer your solar system lasts,the more free power you'll enjoy. How long your system lasts comes down to the quality of each component.

How efficient is a solar inverter?

The industry average for peak efficiency is 97%. Cost: The size and type of solar inverter that you choose directly affects the cost. Size options: A range of sizes means a solar inverter can pair well with a wider variety of solar systems,which is why it is included as a factor in this analysis.
